

Hamilton Wristwatch – Restoration

Here's a perfect example of a wristwatch, well worn, that was brought into us for a complete overhaul. The watch mechanism was intact and in good condition, only needing a cleaning, oiling, new mainspring and a center wheel jewel. The cosmetics of the watch required a new crystal, case polishing/cleaning, winding crown and face and hand refinishing. The entire work was done for about \$400.00 that will include a new strap that the customer has yet to select.
